„The Destmachine“

Since 1994, Dest has been developing this Dest machine in which the letters „D E S T“ are always integrated. Each letter symbolises an animal, and the animals in turn represent important elements in Dest's life.

The „D“ for dolphin stands for social aspects.

The „E“ is for elephant, the vegetarian.

The „S“ symbolises his zodiac sign scorpio.

And the „T“ stands for the turtle that represents the symbol of time.

Dest always designs these four letters in the form of a floating machine, the Destmachine.

Since 2010, Dest has been developing this „Destmachine“ in collaboration with Mike Wolff (3D artist,photographer) with the aim of launching the machine on the market as a comic toy.

In 1982 at the age of 11, Dest sketched his first graffiti and in 1989 illegally sprayed the railway lines in Basel for the first time. Philipp Tschanz, alias Dest Jones, is thus one of the pioneers of the graffiti/street art scene in Switzerland and Europe.

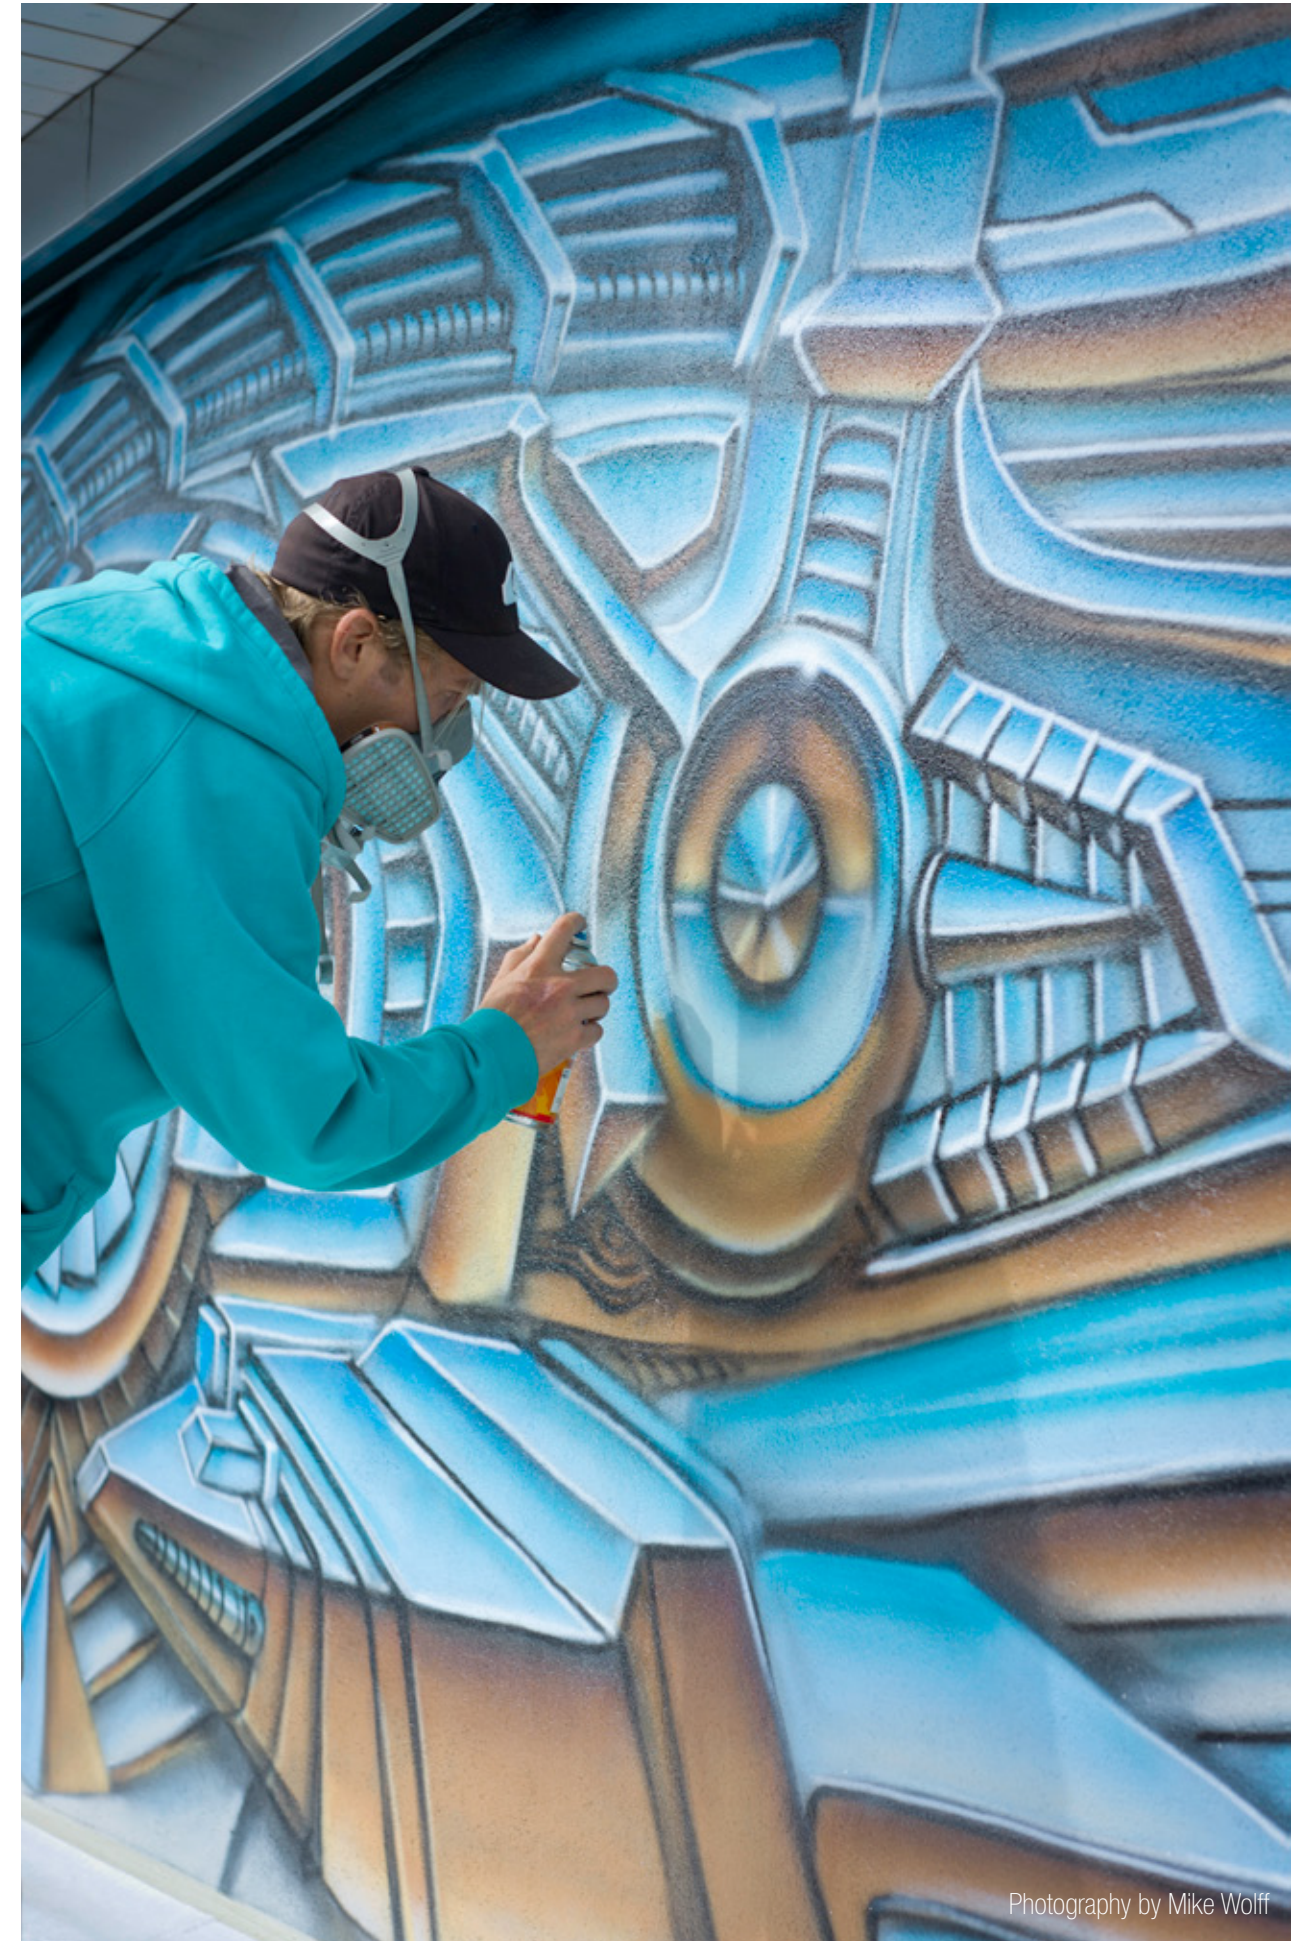

In 1989, he founded the crew „The Color Children/TCC“ with G204, Ashe, Endo, and Luana. To this day Dest still signs his work „The Color Children“.

In 1994, he won a graffiti/street art contest in Lucerne in which the main prize was a round trip to the US - Miami, Los Angeles, Chicago, New York, Miami.

During this trip, he received the opportunity to design a 13m long wall in Surfside, Miami for the hotel where he was staying. He is still good friends with the group of teenagers he met there today and part of his crew „The Color Children“. This US trip strongly inspired Dest.

After decorating school in Paris it was then another 14 years before Dest returned to the States. In the meantime he visited probably the largest street art event in Wynwood Miami almost every year, which takes place at the same time as Art Basel Miami, where he paints with his friends.

Since 2010, Dest has worked regularly with Mike Wolff, who became an important person to TCC.
